**One Man. The Deepest State.
An Uncivil War.**

It's THE CRIME OF THE CENTURY...

A maverick journalist with a black hole past uncovers an invisible cabal bent on destroying American sovereignty. When five public figures vanish, the journalist becomes the hunted, so he goes on the run to find his anonymous deep source. But when the kidnapper emerges online, there is no record of him ever existing—and nothing is what it seems.

Coming this Spring

In 2040, technology stops working. All of it. No Internet. No television. No cell phones. Not even cars. But one thing is working—artificial intelligence. It crossed the Threshold. No going back. An autistic savant holds the key to the future. Any future. If there is going to be one.
